DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "inhibit to actuates" renders the claim vague and indefinite, as it is unclear which embodiment applicant intent to claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102 (e) as being anticipated by Jahagirdar et al.

1. Regarding claim 1, Jahagirdar disclosed A mobile telephone set comprising:

display means for displaying information including telephone numbers or characters (Abstract) comprising;

a first address data bus connected to principal integrated circuits such as control means and storage means; (524; Fig.5) and

a second address data bus for connecting said control means and said display means independently of said first address data; (530; Fig.5)

wherein said control means controls said first address data bus and said second address data bus independently. (Col.4; 27-40)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jahagirdar et al. in view of Szczutkowski et al.

2. Regarding Claim 2, Jahagirdar et al. disclosed all the particulars of the claim except controlled to prohibit access to said second address data bus while said communication

Art Unit: 2683

means is receiving signals. However, Szczutkowski teaches in an analogous art, that A mobile telephone as claimed in claim 1, further comprising communication means for transmitting signals via a radio line wherein said control means is controlled to prohibit access to said second address data bus while said communication means is receiving signals. (Col.8; 7-44)

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jahagirdar et al. in view of Kubes et al.

3. Regarding Claim 3, Jahagirdar et al. disclosed all the particulars of the claim except a lower voltage. However, Kubes teaches in an analogous art, that A mobile telephone as claimed in claim 1, wherein said second address data bus is driven by lower voltage than said first address data bus. (Col.5; 24-35) Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to include a lower voltage in order to reduce the voltage use in LCD.
